OUR PERSONNEL APPROX.

17,000

175 MEUR

In 2021, R&D investments amounted to 175 MEUR, representing 3.7% of net sales.

Sustainable societies through innovation in technology and services

Our value creation potential is based on two strategic themes

1 Decarbonisation creates new business opportunities

2 PERFORM
Leverage market recovery and growth
Continuously improve our operational performance

FLEXIBILITY AND AGILITY TO SUPPORT STRATEGIES

«... HOUSTON WE HAVE A PROBLEM»

In a VUCA* world (Volatility, uncertainty, complexity and ambiguity) agility and flexibility has become a primary enabler for competitiveness.

No single actor has all the required capabilities to keep up speed

To stay competitive is needed to continuously evolve the "understanding-of" and "responsiveness-to" customer

Economically viable "green" solutions require a "smarter manufacturing approach" to have responsiveness with high quality and low cost.

Digital divide with supply chain & Small and medium size enterprises (SME) in terms of competence, resources and investment.

SO HOW TO TRANSFORM?....TOGETHER→ THREE PILLARS

Being SMART

Insightfulness and adaptability to drive transformation

Based on three

pillars

People & Mindset

Knowledge Sharing for Creativity and Growth

Technologies

Smart Assets Sharing & Utilization **TECHNOLOGY & CAPABILITIES SHARING**

Customers

Factories Suppliers

Transparency & Simplicity

Share problems, platforms and power of data

Transformational "Extended Enterprise"

To accelerate the decarbonisation of the energy and marine industries, Wärtsilä has made a major investment in the Sustainable Technology Hub (STH) in Vaasa, Finland.

We have created it to foster innovation, collaboration, and production of green technologies.

To support these ambitions we also needed to increase agility, flexibility and resiliency from manufacturing perspective

STH SUMMARY

Consolidation of Wärtsilä operations from several locations to maximise synergies

Operational Ecosystem with partners to complement capability

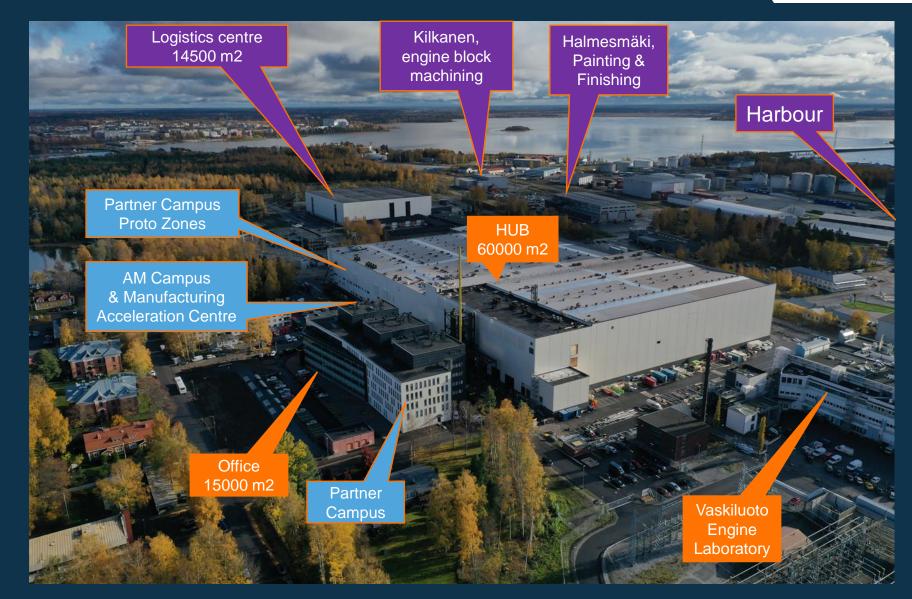

Flexibility to support whole Wärtsilä product portfolio, incl. life cycle

Network and Collaboration

- Partner Campus
- AM Campus (FAME)
- Manufacturing Acceleration Centre (OSME)

SUSTAINABLE TECHNOLOGY HUB TRANSFORM TO PERFORM

7 25.11.2022 Public

STH HUB – THE INNOVATIVE APPROACH

FROM «SILOED ECOSYSTEMS» to.....

BUSINESS OPERATIONAL ECOSYSTEM

"which centers on a firm and its environment"

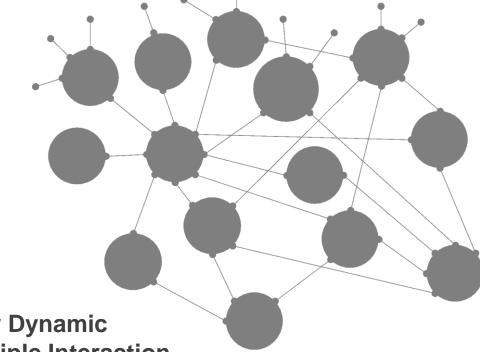

TECHNOLOGY & INNOVATION ECOSYSTEM

"which focuses around a particular value proposition and the constellation of actors that support it"

KNOWLEDGE & PLATFORMS ECOSYSTEM

[Insert classification]

NETWORKED COLLABORATIONS

- Very Dynamic
- Multiple Interaction
- Roles are not static
- The dynamics within the network change with the challenges.
- New Ecosystem Strategy approach is needed → complementary leadership

© Wärtsilä 25.11.2022

WÄRTSILÄ FLOATING LAB – AURORA BOTNIA WASALINE PARTNERSHIP

Smart Navigation system

Exaust treatment system

Hybrid energy managment system

Thrusters and Protouch

PARTNER CAMPUS COMMUNITY

- Fast connection to networks of expertise
 - Risk sharing in innovation

CO-CREATION **NETWORK ENABLER**

- Shared learnings from co-creation journeys
 - Faster time to decision

SHARED PROTO ZONES

- Facilities for shorter and longer cocreation projects
- Facilities for POC Testing and prototype

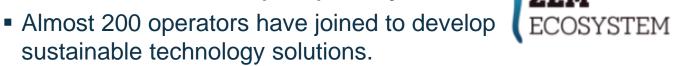

Partner access

Network where data, risks and added value are shared

PARTNER CAMPUS SHOWCASES

ONGOING COLLABORATION PROJECTS

Zero Emission Marine (ZEM) Ecosystem

■ The goal is to reduce GHG emissions from the marine sector with 60% by 2030.

STH Ecosystem Challenge (STHEC)

- An innovation competition where students solve real company challenges.
- The teams develop solutions in an ecosystem consisting of customers, service designers, facilitators, coaches and juries.

OSME - OPEN SMART MANUFACTURING ECOSYSTEM

FROM A STRATEGY TO CONCRETE MISSION & VISION

MISSION

Sustainable Resilient and Flexible Manufacturing

From «Siloed Enterprise» to «Extended Enterprise» -> customers, supply chain and other local SMEs deeply connected and the data flow shared.

VISION

- Open Ecosystem where knowledge, expertise and digital platforms are shared
- Extend this "industrial ecosystem" to other industries by creating a "network of companies" sharing an "open" platform with Add-Ons that generate added value
- Connect the various realities of excellence in a Physical Hub at Wärtsilä, where you can share ideas and develop/test new technologies

SMART MANUFACTURING ECOSYSTEM TECHNOLOGY & CAPABILITIES SHARING

Transformational "Extended Enterprise"

CO-CREATING the EXTENDED ENTERPRISE - OSME O

FINLAND

- We challenge everybody to extend their enterprise and choose how to extend.
- Developing a platform to support sharing and collaboration between the partners.
- Searching constantly for new partners and roles to complement the current capabilities.
- Forming together a truly joint manufacturing development roadmap which benefits all

25.11.2022

FAME AM CAMPUS HOSTED @ STH FAME

A NETWORK FOR GROWTH

FAME

- Share assets costs & Risks
- Get hands-on experience on application & design for AM
- Conduct focused experimentation
- Co-creation space where possibility to set for "zero series" prototypes, prepare recipes for the go to serial
- Get people together from different companies, establishing network, inspiring each other
- Help and support each other, nurture knowledge growth by sharing problems and common findings
- Competitive edge on the market for keeping & growing the manufacturing industry in Finland
